Thinning B=1000, R=50; MC adequate=True
A Slope by thinning probability
b(q), pointwise 95%
Plug-in Poisson reference
b(q)
1/q − 1
B Intercept change: simultaneous bands
delta a(q)
1/q − 1
C Slope-increment sensitivity
All q
Exclude q=0.1
Current count >=50
Both counts >=50
bP
c [pointwise 95% CI]
D Monte Carlo precision
c
delta_a
MC tolerance
MC SE / sampling SE
1/q − 1
